

R&D Tax Credits

The R&D Tax Credits scheme is an HMRC incentive, designed to inspire innovation and increased spending on R&D activities by companies operating in the UK.

Are you working on?

If you are a UK business that has invested in research and development, you could be eligible to claim up to 33% of your costs back in R&D Tax Credits.

Our aim is to simplify the R&D Tax Credits claim process with minimal disruption to your business. We're technologists, not accountants – we have expertise in a wide variety of science, engineering, software and healthcare disciplines and therefore, fully understand the science and technology your project is centred around. We do the work so you can receive the credit, 'bridging the technical expertise gap' between you the Client and your Accountant in order to submit a robust, successful and maximised claim to HMRC.

We have successfully claimed over £24million in R&D Tax Credits on behalf of our clients.

We simplify the R&D Tax Credits claim process with minimal disruption to your business.

What can be claimed?

Subcontract Expenditure

Software Expenditure

Materials Consumables

TBAT Process
